

BLUE GROWTH

DEVELOPING BLUE GROWTH POTENTIAL

The Blue Growth community of projects is featured by the partnership:

BlueGrowthCommunity

BlueGrowthCommunity's (BGC) main objective is to ensure the **communication** and **capitalization** activities of Interreg MED's modular projects in order to increase their impacts towards common identified targets and increase the transnational activity of innovative MED clusters and networks.

BGC proposes concrete activities to enhance capitalization. Thus, BGC enhances the dissemination and transferability of modular projects results to ensure stronger, deeper and wider capitalization, mainstreaming strategic liaising processes aiming at external multilevel stakeholders.

These actions also keep contributing to the sustainable socio-economic development of the MED area through innovative investments in Blue economy, while ensuring a close communication and coordination with PANORAMED.
